Wildfires

Wildfires can happen fast and be bad for my community and the air.

Wildfires can start anywhere and spread to the woods.

I can do things to protect myself before a wildfire starts.

I can remove leaves and trash from outside my home.

I should only start campfires in a fire pit when it is not windy.

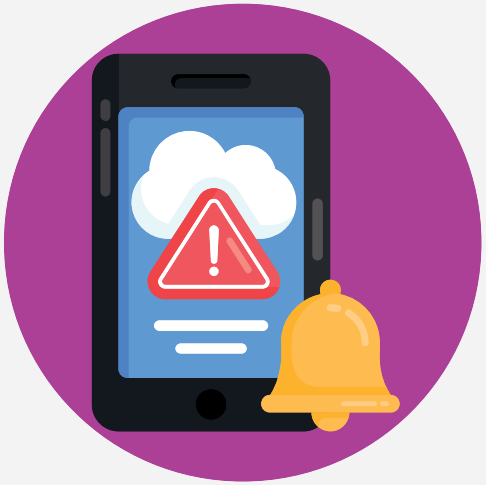

I should always put my campfire out with water and dirt.

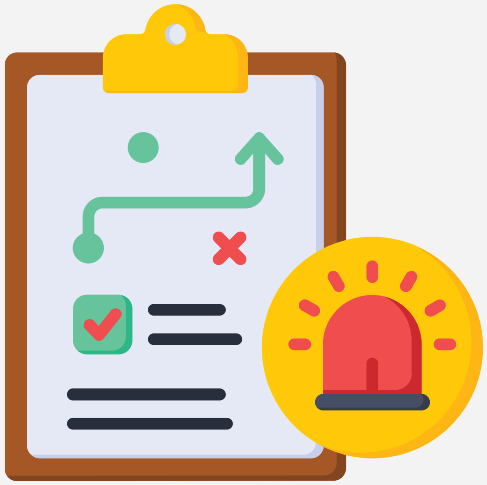

Wildfires

I can sign up for CodeRed Pennsylvania alerts to stay informed about the weather.

I can also have an emergency plan ready in case of an emergency.

If a wildfire starts, I should listen to officials and evacuate right away if I am told to.

I should follow air quality alerts in my area.

If air quality is poor, I can wear a mask or stay inside.

If I am in an emergency, I will call 911.
