

# AFTER BEING FULLY VACCINATED AGAINST COVID-19

I should still wear a mask in public places like movie theaters, barber shops, salons and stores.

I should still wear a mask in crowded public places like festivals, concerts, or sporting events.

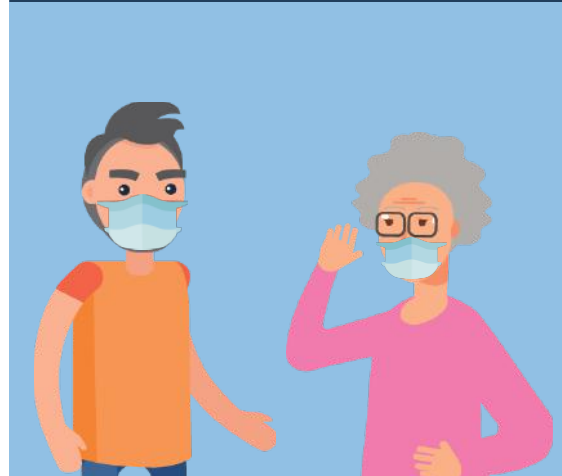

I should still wear a mask when using public transportation.

At school or work I should follow rules about wearing a mask, social distancing, and other safety measures.

I should wear a mask if visiting unvaccinated, high risk people like older adults and people who are sick.

I can visit someone in their house without a mask if everyone is vaccinated or if they are at lower risk.

# AFTER BEING FULLY VACCINATED AGAINST COVID-19

I can ask the people I am visiting if they would like me to wear a mask.

This may help them feel more comfortable.

The COVID-19 vaccine will help me to get back to doing some of the things I enjoyed.

For more information I can visit the CDC's [When You've Been Fully Vaccinated](#) website.
