

BEING PREPARED FOR A FIRE

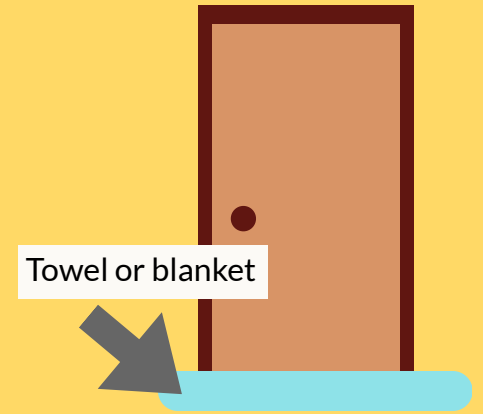

I can take steps to help keep myself safe from fires. I can have a fire extinguisher and move flammable items away from heaters.

I should also have a smoke alarm on every floor of my home.

If you leave your home, try to seal any barriers or cracks before you go.

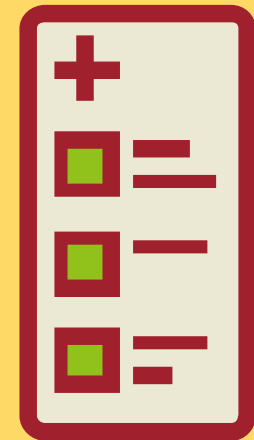

If I hear the smoke alarm, I need to go outside calmly and quickly and leave my things inside.

When I leave I should stay under the smoke even if I have to crawl on the floor. I should also be careful because doors might be hot.

If my family has a safety plan, I should follow the steps in the plan.

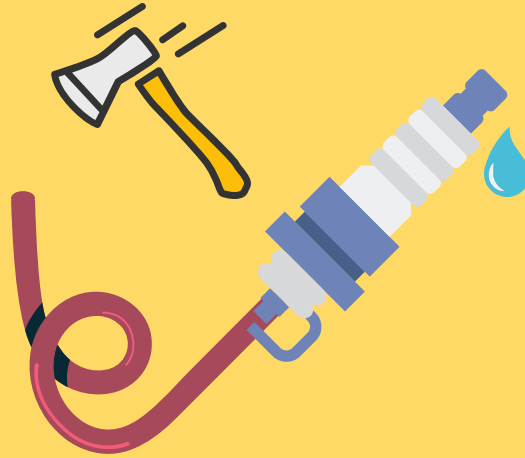

BEING PREPARED FOR A FIRE

When firefighters get there, there will be loud sirens.

The firefighters will use their tools and water to put out the fire.

The firefighters' helmets might make their voices sound scary, but if they're talking to me I should listen.
