

Coming Home From the Hospital After COVID-19

Patricia Graves, BSN, RN-BC, CDDN
Philadelphia Coordinated Health Care

This video for families and caregivers is part of a three-part series discussing coming home after a hospitalization for COVID-19. It includes tips for discharge planning, communication, and preparation for the care of the recovering person at home.

Hospital Admission and Discharge Planning Booklet

KEY TAKEAWAYS

- Discharge planning starts on the day of admission.
- Communication is key to a successful discharge.
- Establish lines of communication with the hospital on admission.
- Have a clear plan for the person's care for when they return.
- REMEMBER the person is still recovering!
