

Best Practices When Teaching New Infection Control Skills

Caitlin M. Conner, Ph.D., LPC, ASERT Western Region

This presentation is designed to support families and caregivers as they transition a loved one with autism back into the community following the COVID-19 pandemic.

Topics include: How to teach a new skill, breaking down the skill, task analysis, tips for teaching, reinforcing the skill and using rewards.

Physical Health

- [Preventing COVID-19 and Monitoring Health](#)

Infection Control

- [Teaching New Skills](#)
- [Desensitization and Wearing a Mask](#)

KEY TAKEAWAYS

- 1 Break new skills into smaller steps to teach
- 2 Use visuals and lists when teaching new skills
- 3 Offer choices and provide praise for trying
